CONFIDENTIAL/EMBARGOED UNTIL 15 AUGUST 2008

Award citation of the EISA Jury:

European 2-Channel Amplifier 2008-2009 NAD C315BEE

Well known for its giant-killing integrated amplifiers, NAD has refined this art to a new level in its C315BEE. Like the legendary 3020 that started the story decades ago, the new C315BEE combines an unexpectedly high power output with a range of genuinely useful facilities. The ability of this little amplifier to drive difficult speaker loads should not be underestimated. Meanwhile, its slim case supports six inputs, a front-mounted socket for portable players and an output for headphones, plus integrated tone and remote control. The C315BEE may appear unassuming, but its musical impact is unashamedly spectacular.
